Experience

Software Engineer – Frontend

*Remote**BrowserStack**04/08/2025 – Present*

- Shipped **6+ production-grade frontend features** across AI-driven workflows and debugging dashboards, improving user efficiency and product engagement.
- Implemented **real-time Pusher updates** to handle asynchronous backend processing, reducing manual refresh dependency by **60%** and enhancing dashboard responsiveness.
- Optimized high-traffic, data-dense dashboard interfaces by refining layout consistency, state handling, and responsiveness, improving overall user experience.

Software Development Intern

*Hybrid**Harman Connected Services**01/03/2025 – 21/07/2025*

- Gained hands-on experience with core concepts of C# and ASP.NET Web Forms under dedicated mentorship, completing over **5** backend modules and boosting development speed by **30%**
- Built a fully functional SmartEdu Admin Portal as a capstone project with **6+** interconnected modules, enabling **100%** CRUD operations for users, classes, subjects, teachers, fees, and exams

Full Stack Developer Intern

*Remote**Grocliq**02/01/2025 – 28/02/2025*

- Chrome Extension Development: Designed and built the complete Chrome extension UI for SEO analysis, improving usability by **45%** and increasing user adoption by **50%**.
- Grocliq GPT Interface: Created a real-time, chat-like frontend using Next.js, Redux, and MongoDB to store message history, enhancing engagement and boosting feature usage by **40%**.
- Dashboard & Pages Revamp: Redesigned the dashboard, Projects, Site Audit, and Rank Tracker pages using Tailwind CSS, Next.js and Chart.js, boosting engagement by **35%**, improving load speed by **40%**.

Projects

CompraPrice Website [🔗](#) – React, Node.js, HTML, CSS, Bootstrap, JavaScript

- Refined a web application that integrates third-party APIs from Amazon and Flipkart via Rapid API to compare product prices, improving user experience and helping users find the most affordable options.
- Integrated a robust API management strategy to handle large volumes of data efficiently, resulting in a **25%** increase in data processing speed.

Role-Based Authentication System [🔗](#) – Refine, TypeScript, React, Node.js, MongoDB, Material-UI

- Implemented a role-based user management system with Refine, React, Google Auth, and custom authentication.
- Integrated efficient PATCH API calls for role updates, achieving a **20%** improvement in update performance.

Nike Landing Page [🔗](#) – React.js, Tailwind CSS, HTML, JavaScript

- Engineered a responsive landing page, showcasing premium products and accelerating conversion by **40%**.
- Boosted engagement with interactive features like reviews and subscription forms, increasing retention by **30%**.

Education

JSS Academy of Technical Education, Bangalore

*26/12/2021 – 30/5/2025**Bachelor of Engineering in Computer Science and Engineering — CGPA: 8.53/10.0*

Technologies

Programming & Scripting Languages: C, C++, JavaScript, SQL**Web Development & Tools:** TailwindCSS, React, Next.js, Git, VS Code, Node.js, Express, MongoDB**Soft Skills:** Teamwork, Leadership, Communication
